## BUILD-TO-ORDER

For applications that require a more precise selection of flux/power combinations than is offered by standard TILE Tunable White, Coolege offers a “Build-To-Order” (BTO) program that allows you to choose a non-standard flux/power combination to optimize for power density while still meeting the required illuminations levels for your design.

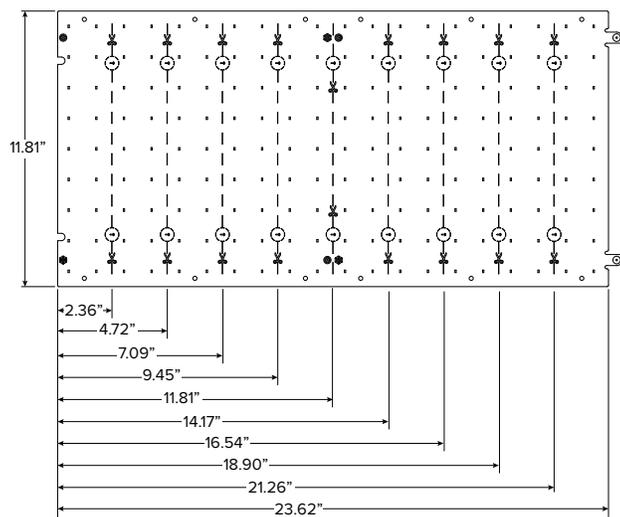

Refer to the table below and select either a desired power level with corresponding light output level, or conversely, choose the minimum flux level that delivers the required illumination to determine the power level.

Notes:

- 1 Power levels shown are for TILES only. Power consumption calculations should include consideration of power supply efficiency, and any electrical losses associated with a specific circuit design.
2. Luminous flux values are based on calculations with a tolerance of ±5% of the value shown.
3. BTO products are subject to longer lead times and increased prices compared to standard TILE Tunable White light output options.
4. BTO is available for Tunable White 2700K-5700K. Power values should be selected for 2700K.
